Gwynedd is a large area that includes polar opposites in terms of language, geography, urban and rural communities, sea and mountains, but also has resources and people who can contribute to developing resilience throughout the county. The Grymuso Gwynedd program will allow Menter Môn and Cymunedoli Cyf, to use their environmental expertise and experiences in entrepreneurship, technology, business, food, language etc. to empower all Gwynedd communities.

The financial support of the program will also enable us to support projects that meet local requirements and offer solutions to the community, to build Gwynedd's capacity across the county. It will be possible to support projects, solutions, and answers within 3 themes- Identity, Services, Assets. This support will offer an output to develop emerging enterprises, grow existing enterprises and fill gaps in geographical areas that do not have any local catalysts or current provision in place.
